

Pump Name

Pump #1

Communication status

Emergency stop

Power supply temperature

FET temperature

Power supply voltage

Pressure cable attached

Valve cable attached

Transducer A/B offset

Sensor Cable Error

Cylinder

A B

Within safety pressure limit

FET current

Motor stall

Transducer Voltage

Pump firmware version

253

Pump serial number

67

PCB Temperature

0

FET Temperature

34

PWS Temperature

28
